Submit a poster for the Biodesign scientific retreat

What is Fusion 2018? Fusion is an annual scientific retreat for Biodesign researchers. The daylong event is held offsite at Civana Carefree (formerly the Carefree Resort). Transportation is provided. This year’s theme is team science. More information about the retreat is available on the electronic invitation or at https://biodesign.asu.edu/fusion-2018.

Who attends? All Biodesign nonfaculty and students are invited this year to submit a poster to be displayed at the retreat where more than 100 Biodesign faculty members can learn more about your work.

Steps to submit a poster:
1. Get approval. Before submitting an abstract, have a faculty mentor approve the following aspects of your poster:
   • Title
   • Authors and affiliations
   • Abstract

2. Gather information
   • Your name, department, email and program (use your ASU email)
   • Faculty mentor name and email address
   • Title of your poster
   • Authors and their affiliations. List yourself first or use an asterisk to indicate the presenting author.
   • Abstract text

3. Write abstract with the following considerations:
   • What background information will someone outside your field need to understand about your work and the nature of the problem you are trying to solve?
   • Does your abstract contain a clearly defined hypothesis or goal?
   • What results were obtained and what methods were used to obtain them?
   • What conclusions can be drawn from the data and what is the significance and impact on the field?

4. Submit on or before Wednesday, March 21, 5 p.m. (The deadline has been extended!)
   If submitted by the deadline, your poster will be included in the event program and be eligible for judging at the scientific retreat. NOTE: Late submissions will not be included in Fusion2018 booklet or available for judging.

Abstracts. Abstracts should be 250 words or less (excluding the title, authors and their affiliations). Your poster should detail current work or work you have conducted at the Biodesign Institute within the past two years. You are welcome to use posters you have already made for other meetings.

Posters. All posters will be printed on semigloss paper, at no cost. Maximum size is 42 x 42 inches.

Based on submissions, a select number of poster presenters will be invited to give a brief presentation highlighting their research during the Rapid Fire round that kicks off the poster session.

Prizes and award certificates will be presented!

Questions? If you need additional information about the poster session or submission, please contact Julie.Kurth@asu.edu. For printing questions, email Michelle.Saldana@asu.edu.
