U.S. Flu Vaccine Effectiveness Network

The CDC is partnering with ASU on a longitudinal study to investigate immune response of influenza and COVID-19 vaccines.

Involves:
- Voluntary participation throughout the flu season
- Up to 6 visits
- Up to $200 compensation

Do you qualify?
Healthy adults 18-64 that have not received the current season’s influenza or COVID-19 vaccination in the past six months.

VACCINATION
Participants will be randomly assigned an FDA approved influenza and COVID-19 vaccine that will be administered simultaneously or 28 days apart.

BLOOD DRAW
There will be a blood collection for every in-person visit to measure antibody waning.

WEEKLY FOLLOW-UP SURVEY
For surveillance purposes, participants will complete a brief survey to determine the presence of new flu-like symptoms.
